1.5 MM ANTI SCRATCH ACRYLIC SHEETS

We bring to you a new fashion trend in contemporary homes, encompassing any piece of furniture with a shiny and highly reflective, supersmooth, polished finish. It looks stunning. Imagine replicating this look with just about any type of furniture- from bathroom cabinets, to glossy living room furniture, to elegant fitted wardrobes in the bedroom. It creates a fabulous contemporary look in any modern house, apartment, showroom, office restaurants, receptions, conference room, retail counters etc.

This unique finish creates a smooth, clean, contemporary and minimalist feel in any home. It brightens up any room by reflecting light instead of absorbing it. By day, as long as there is some sunlight entering the house, your new glossy surfaces will keep the house feeling light and energetic. By night, it reflects artificial light provided by overhead lights and lamps. This adds another dimension to flat or dull spaces, and can completely change the look of a room. So go on, use these laminates and create your own masterpieces.

Tables • Counter Tops • Doors • Cubicles • Lockers • Cabinets

Wall Cladding & Partition

GENERAL USE & CARE GUIDE

These laminates are manufactured with aesthetics and durability in mind. when used as recommended and with appropriate care, our laminates will last through

LAMINATES

- Cleaning should be done with water and clean, non-abrasive cloth.
- To remove more stubborn stains, use mild household cleansers like colin & gently wipe down with a non-abrasive cloth.
- Avoid the use of abrasive liquid cleansers, bleaching compounds or solutions as these may damage the surface of the laminate.
- Do not place hot cookware directly on the laminate. Prolonged exposure to temperatures above 30 degrees Celsius may cause damage to the laminate surface.
- Do not use the laminate for purposes that it is not intended for (E.g. do not iron chop, hammer or expose the laminate to open flame)
- Outdoor application of the laminate with exposure to direct sunlight and weather conditions are not recommended.
- UV rays may de shape the laminate .
- Gloss surfaces are recommended only for vertical application.
- Do not use thinner and toluene on the surface of the this laminates, this may cause decolourisation of the surface.
- Store the laminates at temperature below 30 degrees Celsius.
- Typically conform to internationally recognize technical standards.
- Have a thickness balance of +\ -10%.
- Peel off the protective film after processing.

LIMITED WARRANTY

Our products are reasonably free of defects and when properly handled and fabricated will comply, within reasonable deviations to applicable manufacturing specifications. Clients are advised to inspect products thoroughly prior to installation. Our warranty will not cover defects and non-compliance from and or otherwise attributable to any other causes, including, without limitation.

- Improper handling / transportation / storage of the products
- Improper installation of the products
- Improper or unintended usage of the products
- Lack of improper maintenance of the products
- Exposure of the products to extreme temperatures
- Unauthorized alteration to the products
- outdoor applications

- **NO GUARANTEE & NO EXCHANGE IN ANY CIRCUMSTANCES**
- **THERE CAN BE COLOUR VARIATION IN MATERIAL FROM DIFFERENT BATCHES**
- **IT IS ADVISED TO USE SAME BATCH MATERIAL TO AVOID COLOUR VARIATIONS**
- **ACTUAL COLOURS OF THE LAMINATE SHEET MAY VARY FROM THIS BROCHURE**

Bonding of laminate under high humidity, plywood with high moisture content, ply with uneven surface, inferior quality adhesive and insufficient pressure may lead to delamination / air bubbles in between ply and laminate

tips

Acrylic are bonded in extremely humid conditions

Use of water base synthetic resin adhesive any other the PEVA (Polyethylene Vinyl Acetate Co-polymer)

When substrate loses moisture after installation

Debonding in certain areas because of uneven substrate surface

Insufficient or lack of pressing during the bonding period of laminate

Use of extremely large acrylic/PVC laminate sheets (more than 8 ft x 2 ft long)

To avoid de lamination / air bubbles in between ply and laminate the above steps should be taken care of. Bonding of acrylic sheets shouldn't be completed under high humidity

Reasons for air bubble formations on Acrylic Sheets

Limited Warranty

Ozone Products are tested to be reasonably free of defects, and when used and fabricated properly they will comply with the applicable manufacturing specifications within realistic deviations. We recommend customers to inspect properly before installing. OZONE warranty in on way covers defects and non-compliance from or otherwise attributable to any other causes, including without limitation the following:

- Improper handling / transportation / storage of OZONE
- Improper installation of OZONE
- Improper or unintended usage of OZONE
- Lack of or improper maintenance of OZONE
- Exposure to high temperatures
- Unauthorized alteration to the products
- Outdoor applications
- There will be no guarantee or exchange under any circumstances
- color variations in products from different batches are possible
- We recommend using products from same batch to avoid color variations
- This brochure is for presentation purposes only. Actual colors may differ.

- Exposure to direct sunlight can gravely affect a laminate's appearance
- Use inferior or sub-standard dipped plywood or dipped lipping patti, which may chemically react the adhesive.
- The use of synthetic rubber adhesives such as SR / Jat Pat, Bostic, Heatex, Etc.
- Prolonged exposure to high temperature (above 30°C-35°C)
- If hot cookware or utensils are directly placed on the laminate
- To avoid the inside cracks & stretch line Do not store acrylic sheet in roll form.

Disclaimer

- Do not use plywood with high moisture content
- Do not use ply with uneven surface
- Avoid using inferior quality adhesive
- Apply sufficient pressure
- We do not recommend pasting of sheets on the printed/branding area of the plywood
